INTRODUCTION

This bilingual Directory is designed to provide a single quick-reference source for identifying and locating the units which produce scientific information in Iran. It helps in improving exchange of information.

Scope

The scope of the Directory is basically limited, with few exceptions, to government organizations of Iran. It covers about 450 institutions currently active through out the country.

Basis of compilation

Information concerning these institutions were gathered by means of a quistionnaire. This information consisted of the following entries :

- Offical name of institute
- Parent organization
- Address & telephone number
- Subject coverage
- Publication activity

After receiving and controlling the answers, it was noted that the names of parent organizations were frequently reported in different forms by the affiliated units. Besides some of the institutions did not answer to the English part of the questionnaire and some others transliterated their answers to English, We tried to correct these points through various approaches but, unfortunately, in some cases our efforts were unfruitful.

A small number of institutions were excluded from the Directory since they did not reply to the questionnaire on time. These were: Namazee Hospital; Sharif University of Technology, Department of Mathematics and Computer Science; Heart Hospital Cardio Vascular Medical Centre, Nursing School of Heart; Army School of Nursing; Iranian Society of Oral Surgeries; etc.

Arrangement

The main body of the book is divided into three parts. The first part is dedicated to the universities and institutions of higher education. Ministries and their affiliated organizations, including their training centers, are listed in

the second part. The third is allocated to scientific associations, professional societies and a few semi-dependent institutions.

Each part is arranged alphabetically according to the persian language. The only exception is the Prime Ministry which is mentioned before all the ministries. Under the official name of the parent organizations, affiliated institutions are grouped alphabetically.

The subject index and alphabetical index in persian language at the end of the Directory with reference to page numbers facilitate the access to the main part.

English indexes are published as a supplement. These indexes refer to the entry numbers*.

The subject indexes-based on Unesco Classification-serve as a key to the major fields of interest of each reporting unit.

Comments or suggestions for improvement of the Directory are always welcomed.

* Two entry numbers (89 and 290) were omitted when the Directory was typed

Aknowledgements must be expressed to Mrs. Leela Mortezaei
& Mr. Mahmood Motaghedi the compilers of the Directory.
